

SPONSORSHIP OPPORTUNITY

GRAY'S REEF MATE ROV COMPETITION

When you become a Gray's Reef Foundation sponsor, you align your corporate governance with our social and environmental relevance. Gray's Reef invites schools across the southeast to participate in STEM skills development, team building, and place-based learning through the engineering of underwater robots for science missions featured in our regional MATE ROV Competition.

Our marine technical trade education program introduces coastal ecology, oceanography, physics, fundamentals of mechatronics, electrical circuitry, systems engineering, data interpretation, coding, and the development of 21st-century workforce skills. Be a catalyst for ocean inspiration and innovation.
